

300 Series Insect Screen – Installation Instructions

1. Open the 300 series window using the turn function of the Tilt and Turn window.

2. Ensure the pull tab is on the top of the screen.

Pull tab

3. Insert the screen through the window on an angle to put the screen to the outside of the window.

4. Once the screen is completely outside, hold it square to the window.

5. Attach the clips over the windows outer weather stripping on the bottom of the window frame.

6. Attach the clips on sides that are nearest to the bottom of the frame over the windows outer weather stripping. Attach one clip on the left and the right.

7. Once the two clips (Step 6) are attached over the outer weather stripping, ensure that the screen is aligned in the center of the window opening.
8. Attach the remainder of the clips on both sides of the window.
9. Attach the top clips.
