OBSCURED GLASS OPTIONS

Cascadia offers several obscured glass options to highlight & enhance your glazing package. Our standard "Obscure" glass is P516. Other available patterns include:

- Delta Frost
- Glue Chip
- Cross Reed
- 42 Clear
- Seedy/Reamy
- Rain
- Narrow Reed
- Satin Etch
- White Laminated

Cascadia partners with Cardinal IG in Hood River, OR for insulated glass units and other Patterned Glass options may be available as offered by Cardinal. Rain, Reed and Cross Reed require the rough surface facing out on the # 1 or # 4 surface of an IG unit in order to get a good seal. All other pattern options have the rough surface glazed to the inside of the IG unit, # 2 or # 3 surface.

Please consult with your Cascadia representative for more information.
