

## OBSCURED GLASS OPTIONS

Cascadia Windows & Doors partners with multiple suppliers for standard insulated glass units (IGUs) as well as obscured glass.

Cascadia's standard obscured option is P516, with additional options available.

Other common obscured glass options are:

- Delta Frost
- Glue Chip
- 42 Clear
- Rain
- Narrow Reed
- Satin Etch
- White Laminated

Custom patterns can also be produced to meet project needs.

For Rain and Reed options, the patterned surface must face outward on surface #1 or #4. This is required to ensure IGU performance.

All other pattern options have the patterned surface on the inside of the IGU, on surface #2 or #3.

For more information and glass options, please contact your Cascadia representative.

Sheet Size: 72" x 96" | Thickness: 4.7mm

Sheet Size: 72" x 96" | Thickness: 3.9mm
