

UNIVERSAL SERIES™ STANDARD & CUSTOM COLORS

The Universal Series™ offers a patented, high-performance fiberglass solution for window wall, windows and doors, and storefront glazing.

The Universal Series™ fiberglass frames are factory-finished to project requirements using a low-VOC Hydro Tuff water-borne urethane coating. Exceeding AAMA 625 performance standards—the highest criteria for fiberglass frames—the Universal Series™ fiberglass frames are resistant to blistering, peeling and chipping and have a modelled lifespan of 50-80 years.

- Custom colors available, formulated to match other materials or color references
- Low-VOC standard & custom colors exceed AAMA 625 performance criteria (Hydro Tuff water-borne urethane coatings)
- Made from high resin-to-glass, thermoset fiberglass, the windows will not sag, weaken or creep over time
- Can withstand extreme temperatures (-40°F through 350°F, and higher) without becoming brittle or soft
- Made from non-organic, chemically inert pultruded fiberglass, the windows are not susceptible to corrosion, rot, insect damage or UV degradation
- LBC Red List Free and Energy-Star rated

NOTE: Colors represented on screen may differ from physical product colors and are subject to availability.
When selecting a standard frame color, please request a color sample kit and discuss your project with the Cascadia sales team.
